Automatic chapati making machine

Your customers will love to watch roti, chapatti spiral down the conveyor system and come out piping hot and ready to eat! Chapatti popularly known as roti is a major part of our indian food. Its use is perhaps as ancient as the pyramids. In the north india it comprises major intake of our daily diet.

Chapati making machine has the carousal display cooking and easy, labor saving, one person operation. The fully automatic roti, chapatti machine will always produce the same consistent, freshly made roti, chapatti!

Key features of automatic chapatti maker

- Unique and reliable design
 - The automatic roti, chapatti is highly effective as well as nonstop continuous roti, chapatti producing process.
- Machine is fitted with heavy duty mild steel fabricated structure
- Easy to operate, saving time and labor
 - Operator needs no experience, production is rapid. The thickness of chapatti and size of finished products are adjustable.
- Advanced design and sanitary
 - Machine is easy to assemble, clean and maintain
- Uniform products, reasonable price, small size, easy maintenance
- Robust construction
- Low specific power consumption
- Durable long life

Operating system of chapatti making machine

This jas automatic chapatti maker can make up to 500 to 600 flour chapatti per hour depending up on diameter, thickness of chapatti is adjustable. The automatic chapatti maker provides easy of use and cleaning, saves labor costs and ensures product uniformity. We offer chapatti tortilla baking oven makes high quality chapatti to enjoy the natural aroma and flavor of wheat. It is design to be installing in army camps, banquet halls, community kitchens, gurudwara's langars, large industrial organization canteens, tourist villas, suburbs and direct sale to the public. It produces 8 to 10 pieces per minute chapatti or tortilla. It is

manufacture in stainless. It provides with fire-resisting glass. The flour tortilla (roti, chapatti) machine has a feeder and an integrated cooker. Temperature adjusts available.

Operating system of automatic chapatti maker

Dough mixer (floor kneading machine): this machine would consist of heavy-duty stainless steel body with multi-purpose arms. Heavy-duty gears are providing to take the full load and to avoid damage to the mixer arms.

Sheeter: sheeter consisting of a heavy-duty frame with gauging rollers driven by a motor with gearbox arrangement would be provided. The hopper would be of stainless steel with proper taper. The dough is smooth formed from the hopper in the form of a sheet and feed to the gauging rollers. The distance between the gauging rollers would be adjustable and this would depend on the desired thickness of the roti, chapatti. The rollers would be polytetrafluoroethylene (teflon) coated (food-grade material). There would be an intermediate conveyor to feed the dough sheet to the cutting plant. The conveyor belt would be of food-grade material.

Rotary cutting unit: a rotary cutting is would be fitted on a roller for smooth and accurate cutting roti, chapatti as per the desired size. There would be a provision for shifting the generated scrap back to the hopper.

Baking oven after cutting chapatti it is passing through oven at suitable temperature for 1 to 2 minute. After complete baking of chapatti it is pack and ready for serve or market.

Standard accessories of automatic chapatti making machine

- Suitable 4 pole totally enclosed fan cooled three phase or single phase sq. Cage motor as per is: 325 or 996. {electricity (special power can be accommodated): 110/220/380/415 volts, 50 hz , 1/3 phase }
- Sheeter, rotary cutting unit, baking oven.

Extra accessories of automatic chapatti making machine

- Dough kneading machine
- Starters, main switch, ampere meter, capacitor, for three phase electric motor.
- Suitable miniature circuit breaker as per is: 8828 with 3 meter cable & 3 pin top as per is: 1293 for single phase electric motors
